

# NEW EQUIPMENT RELEASE

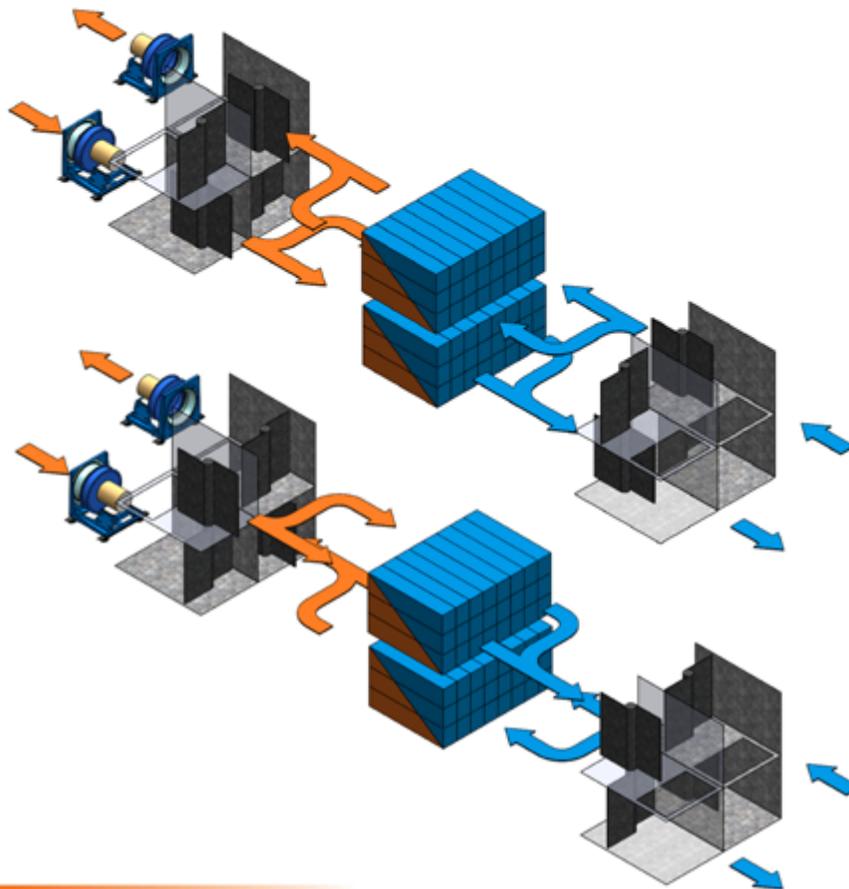

## We are pleased to announce two new equipment additions to the Tempeff catalogue

### RGN DEDICATED PATH

Designed for indoor use when the design requirements require long duct runs and increased external cross leakage may be an issue. This unique design continually keeps the outside air intake and exhaust air separate eliminating any external cross leakage caused by extended duct runs.

The RGN comes with all the traditional Tempeff Standard Features and can be equipped with these additional options:

- High Efficiency Filters
- Heating & Cooling Coils
- Indirect/Direct Gas Fired Burners
- Humidifiers
- Pressure Gauges
- VFD's
- GFCI Receptacles
- Viewing Ports
- Marine Lights
- Service Corridors
- Special Coatings
