

NEW EQUIPMENT RELEASE

We are pleased to announce two new equipment additions to the Tempeff catalogue

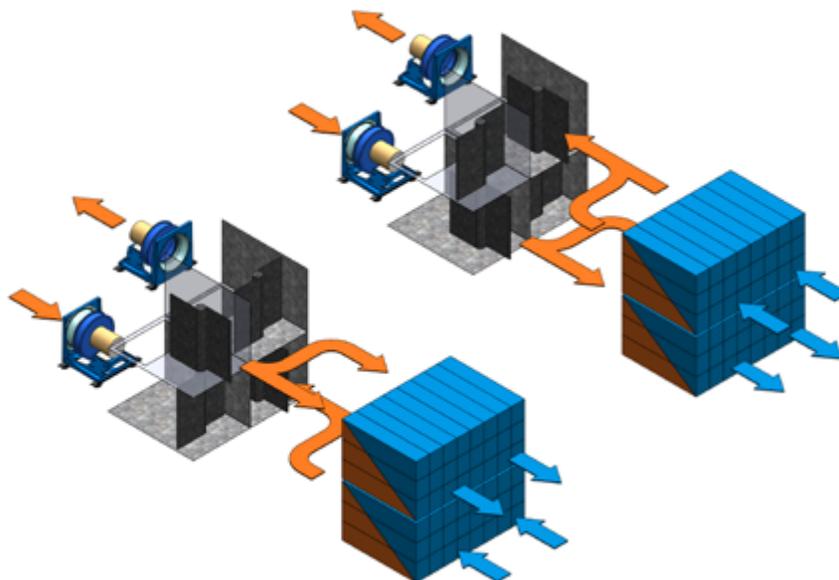

RGN

Designed primarily for indoor use when the design requirements call for the exhaust and supply air ducts to be located on the same end. This streamlined design reducing complex ducting requirements resulting in a more compact installation. The RGN comes with all the traditional Tempeff Standard Features:

- ||||||| 90% Temperature Efficiency (+/- 5%)
- ||||||| No Requirement for an energy robbing Defrost Strategy
- ||||||| Internal Shut Off Dampers
- ||||||| Free Cooling
- ||||||| Recirculation/Morning Warm Up Mode

Additional Options:

- ||||||| High Efficiency Filters
- ||||||| Heating & Cooling Coils
- ||||||| Indirect/Direct Gas Fired Burners
- ||||||| Humidifiers
- ||||||| Pressure Gauges
- ||||||| VFD's
- ||||||| GFCI Receptacles
- ||||||| Marine Lights
- ||||||| Viewing Ports
- ||||||| Service Corridors
- ||||||| Special Coatings
- ||||||| Plus Many More

DUAL CORE® TECHNOLOGY
